

FOCUSED ETF MODEL

THIS MODEL IS ELIGIBLE FOR RISK ASSIST | THIS MODEL IS ELIGIBLE FOR PRINCIPAL GUARD

ABOUT THE FREEDOM DYNAMIC® ELEMENT

Tactical asset allocation with concentrated positions for potentially higher returns

The Freedom Dynamic® Element of Freedom Capital Management Strategies® utilizes tactical asset management and concentrated portfolios in an effort to achieve higher rates of return with less attention to levels of risk. This Element incorporates economic, quantitative, and fundamental analysis of capital markets to identify the most compelling investment opportunities globally and allows portfolio managers the flexibility to make concentrated investments across asset classes, geographies, economic sectors, and investment styles.

INVESTMENT OBJECTIVE

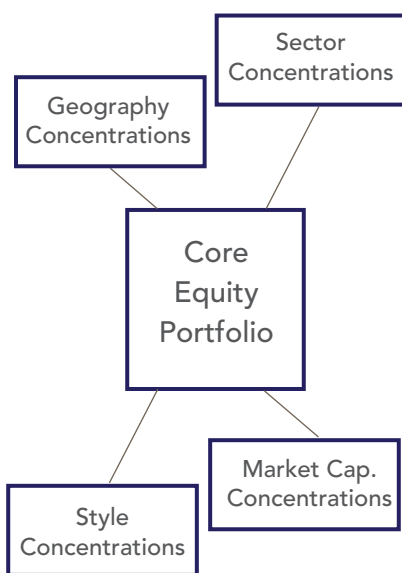

Investors choosing the Dynamic Focused ETF Model seek maximum growth and appreciation of their assets through a tactically managed, flexible investment process that attempts to outperform equity markets over the long run.

ABOUT DYNAMIC FOCUSED ETF

The Dynamic Focused ETF Model is a core equity strategy that seeks to add value by making concentrated, tactical satellite investments in different geographies, economic sectors, market capitalizations, and investment styles. The portfolio is dynamically and flexibly managed by the portfolio management team who utilize economic, quantitative, and fundamental analysis to identify the most compelling investment opportunities across global equity markets.

REASONS TO CONSIDER THIS PORTFOLIO

- You seek maximum growth and appreciation of your investable assets with no concern for current income.
- You can tolerate levels of risk similar to or greater than global equity markets.
- You desire a portfolio that provides maximum flexibility in an effort to achieve higher rates of return.
- You are not tied to a static allocation strategy and seek to capture shorter run deviations in global capital markets through tactical investment decisions.
- You prefer a portfolio comprised solely of exchange traded funds (ETFs).
- This model is eligible for Risk Assist or Principal Guard.
